

Call: 856-702-2624 to speak with Zahid's Multi-Lingual Voice Agent (Alex) today!

How does this work?:

Alex is built to handle inbound business calls 24/7 in 5 different languages (English, Spanish, French, Arabic, and Portuguese). It parses natural language to qualify prospects, handle objections, and autonomously book appointments.

I engineered Alex using Retell's Single Prompt Agent, through a meticulously crafted prompt, covering all fronts and preventing hallucinations. I utilized an API Key to seamlessly integrate the Agent with my cal.com availabilities. Once the conversation reaches the point where Alex asks the client if they would like to schedule a free 30 minute consultation, the API is triggered to check cal.com availability, offer to client, find new times to offer, and book the appointment. The backend telecommunications were handled by configuring Elastic SIP Trunks and custom URIs to seamlessly route PSTN traffic to cloud-based LLMs. The conversation is optimized to maintain a sub-700ms latency threshold, ensuring fluid, human-like dialogue.

Feel free to call the number above and chat with Alex today!

Thank you,

Perfect. What's the best email and phone number to send your confirmation to?

Uh, send it to Z-A. H-I-D dot S-I-D-D-I-Q-U-I-2-0-0-6 at gmail dot com.

Thanks for that. And what's the best phone number to reach you at?

Uh, let's say 732-287-4940.

📞 Called check_calcom_availability >

Let me check Zahid's calendar for the next few days and see what times are open. I have some openings—would Monday at 9:00 AM or 10:00 AM Eastern work better for you?

{ "available_slots": ["2026-09-21T09:00:00.000-04:00", "2026-09-21T09:30:00.000-04:00", "2026-09-21T10:00:00.000-04:00", "2026-09-21T10:30:00.000-04:00", "2026-09-21T11:00:00.000-04:00", "2026-09-21T11:30:00.000-04:00", "2026-09-21T12:00:00.000-04:00"] }

Uh, you got any other times?

Yeah, I also have 10:30 AM or 11:00 AM Eastern on Monday. Would either of those work for you?

Do you have any other times later in the day

"Thanks for calling LeadScript AI. I'm Alex, LeadScript AI's receptionist. We specialize in custom AI voice agents, workflow automations, and our Digital Privacy Shield to protect your personal data from brokers. Would you like to learn more?"

Uh, sure.

All right, just so I can help you better, can I get your first name and what kind of business you run?

Yeah. My name is John, and I run an HVAC company.

Thanks, John. I'd love to get you on Zahid's calendar for a free 30-minute consultation so he can show you how we can help your HVAC business. Does that sound good?

Um, tell me more about what this is about.

Before we schedule anything.

Sure, no problem. So, basically, we build custom AI voice agents—like me—that answer calls for HVAC and other service businesses, so you never miss a lead or lose revenue to competitors. We also automate your internal workflows to cut down on manual work, and we offer a Digital Privacy Shield to keep your personal info off data-broker sites. Is there a specific area you want to focus on, or do you want to hear more about one of those?

Yeah, I think recently I've been losing a lot of customers because I
